

We Want to Honor **YOUR TIME**

Thank you for joining us at Maxwell Family Housing's Utility Allowance Town Hall. As you learn about key changes to the Air Force Utility Allowance Program, please submit your questions using the QR code provided to you upon arrival. This helps us document your questions and share answers with all residents, as others may have the same question.

You may submit questions at any time throughout the presentation. All questions will be answered at the end of the presentation and will also be published on our website.

Thank you for helping us create a clear and informative Town Hall experience for our community.

HAVE QUESTIONS?

Please submit your questions to be answered in the Town Hall by scanning this QR code.

Air Force UA Program VIDEO

<https://www.youtube.com/watch?v=SgbCvJKdhvA&t=8s>

U.S. AIR FORCE

Why a Utility Allowance (UA)?

- **Basic Allowance for Housing (BAH) includes two components: one for rent, and one for utilities**
- **Department of Defense policy on Utility Allowance is to:**
 - **Encourage conservation by making residents responsible for their energy consumption (electricity and natural gas)**
 - **Reward Service members who conserve utilities to keep the difference between the cost of their consumption and the UA**
 - **Provide Services with the flexibility to adjust the UA based on actual consumption data and experience with the initial methodology**
 - **Conservation of utilities lowers demand on the grid increasing the resilience of the system to support mission requirements**

Variances in Energy Efficiency of Homes

- The primary goal of the UA Program is to **promote energy conservation** through positive behavioral changes among residents.
- **Program Design**
 - The UA Program is structured to **account for differences in home energy efficiency**. Homes are grouped into “**like-type**” **categories**, ensuring comparisons are made only among homes with similar efficiency and thermal characteristics. This approach provides a fair and accurate baseline for usage calculations.
- **Impact on Billing**
 - Because energy efficiency is already factored into the program design, **homes within the same like-type group share similar energy use profiles**. This means efficiency differences are not expected to influence individual residents’ billing outcomes.

Air Force UA Program Overview

The UA Program is an OSD mandated program that provides the privatized military partners the opportunity to participate.

The UA Program's baseline calculations use current weather conditions.

3 months of mock billing will be provided to allow residents an adjustment period to get familiar with the program.

Utility baselines are calculated based on the current month's weather conditions as well as the commodity rate.

Under LIVE billing, most Airmen will likely experience no out-of-pocket expenses. The utility component of the BAH should cover utility costs for the majority of household's who consume "normal" or average usage. Those with above normal usage will only owe if the payment is above the \$50 threshold.

Benefits of the New UA Program for Residents

Accurately calculates energy costs

- Based on monthly averages, and current utility rates to account for seasonal impacts and real-time costs
- Increases Airmen transparency

Promotes energy conservation

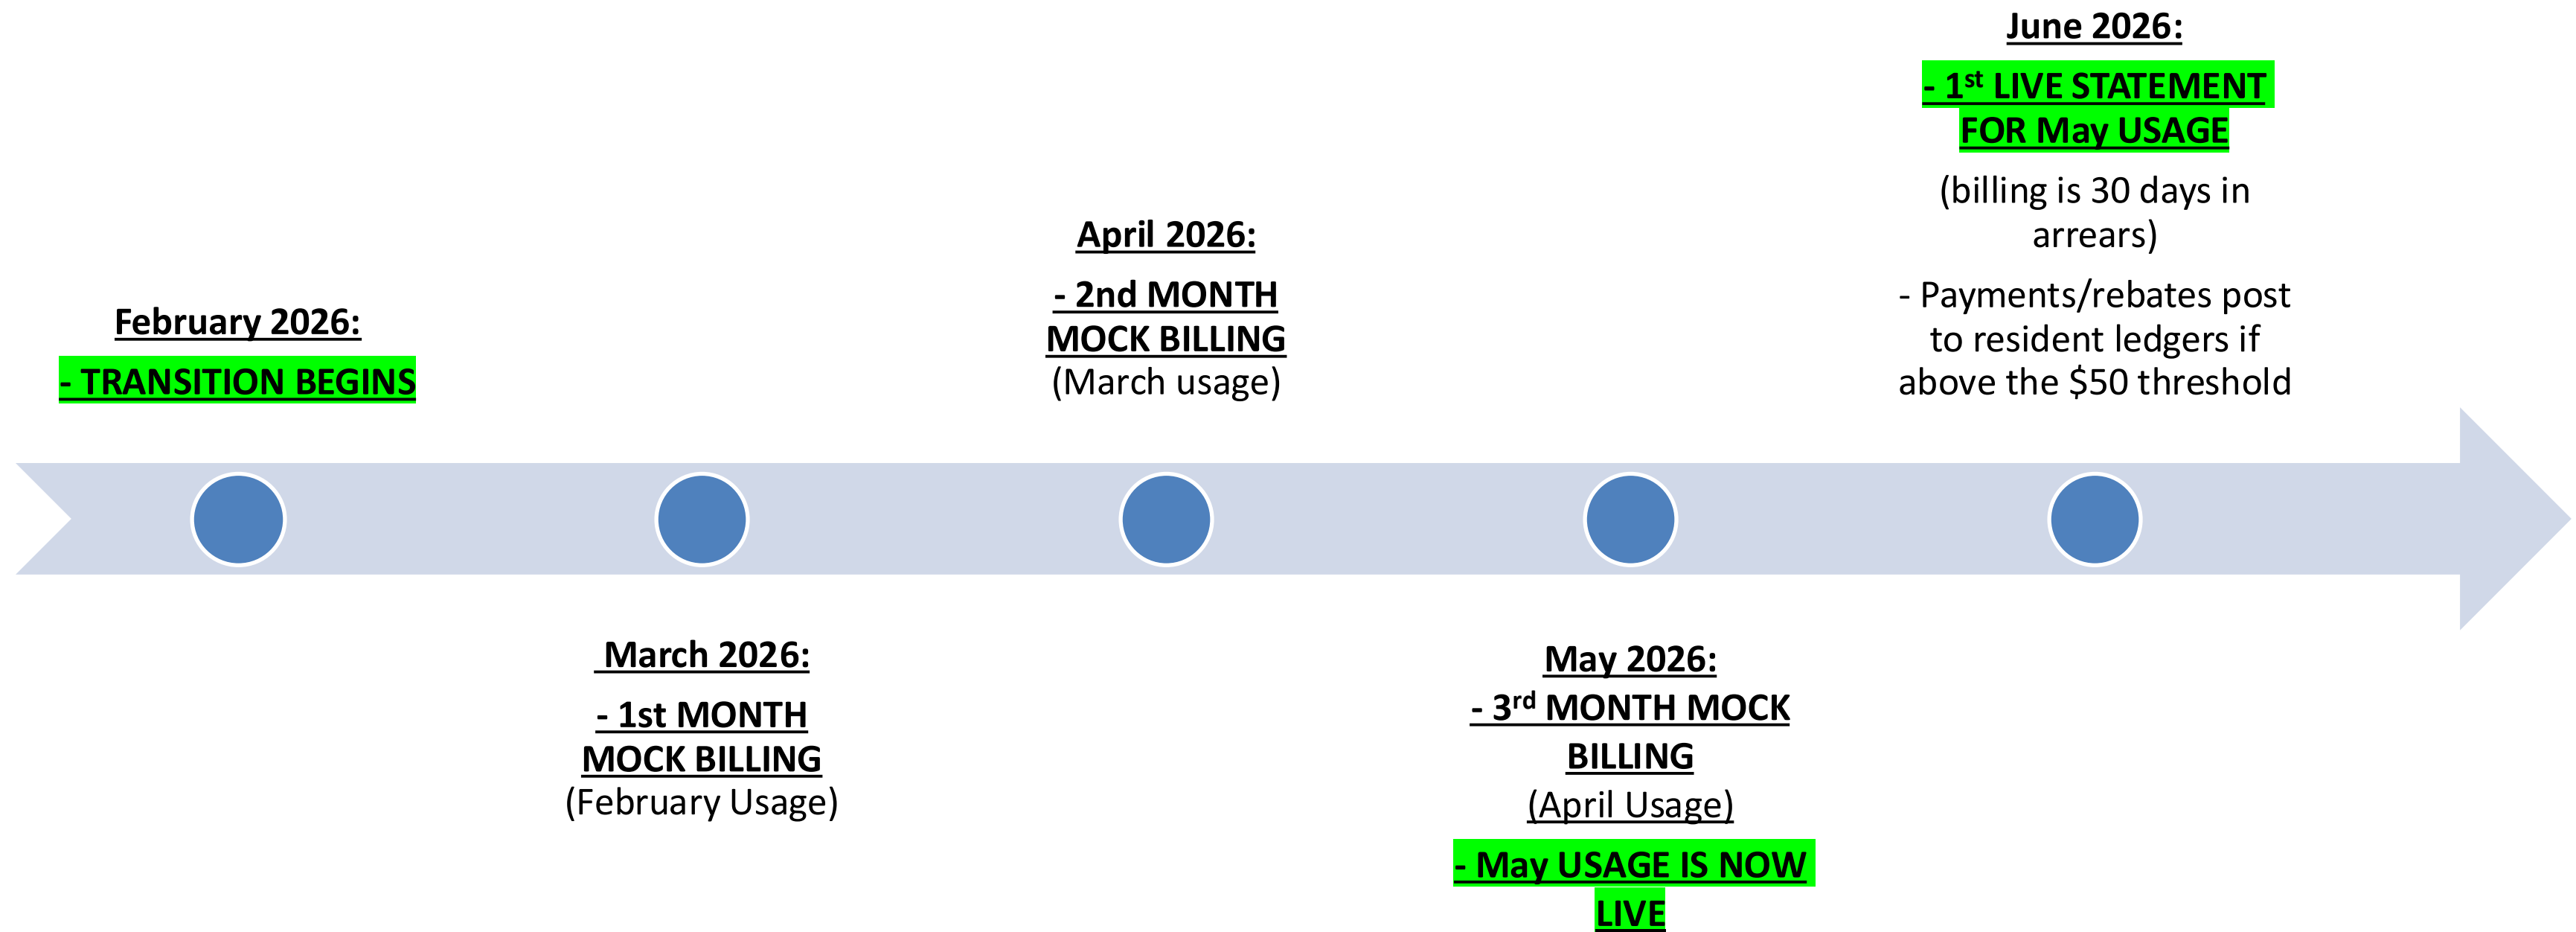

- Offers rebate incentive to those who conserve electricity & gas beyond the normal usage range
- 50% of residents will receive rebates for conserving
- Zero out-of-pocket costs for the average utility consumer

Allows more project funds to be reinvested in homes and communities

- Balances financial incentives to residents and helps reduce project operating expenses
- Encourages Project Owner investment in energy-saving initiatives

Air Force UA Transition Milestones

IMPORTANT NOTE:

YES Energy UA billing statements will always be delivered ~30 days after the usage period has closed.

This is due to the time needed by the 3rd Party Billing Company to receive the meter and cost data from the Utility Provider and calculate the UA baseline averages for each LTG, along with, payment and rebate allocations.

How are LTG's Determined?

Like Type Groups:

- Homes are grouped together in “**Like Type Groups**” (LTGs) based on factors that influence energy usage including:
 - Size (sqft, number of bedrooms)
 - Age of the home (year built)
 - Construction style and thermal characteristics
 - Variations in type of heating and cooling equipment
- *****Family size is not a factor*****

Small Like Type Groups:

- For small groups with fewer than 10 homes or unique homes, the baseline average will be determined using:
 - 5 Year Rolling Average Method
 - Per Square Foot Method

Overview of the UA Billing Process

How Are UA Payments & Credits Determined?

- **1) Establish the baseline average for every LTG (by commodity):**
 - Remove Exclusions: Vacant/Partially Occupied Homes, Estimates, Homes with Electric Vehicles, and Civilians
 - Eliminate the Highest 10% and Lowest 10% of Users (If >10 homes in a LTG)
- **2) Compare each home's usage against the baseline average:**
 - **REBATE ISSUED:** If your usage is **BELOW** the baseline, you will be eligible for a credit
 - **PAYMENT DUE:** If your usage is **ABOVE** the baseline, you will need to pay for the extra usage
- **3) Apply the \$50 threshold:**
 - Payments/Rebates **BELOW** the \$50 Threshold: **NO ACTION** (unless the cumulative balance exceeds the threshold)
 - Payments/Rebates **ABOVE** the \$50 Threshold: **PAYMENT DUE** or **REBATE ISSUED**
 - **At the Baseline:** If your usage falls equal to the normal average usage amount, you will owe nothing (covered by BAH)

Sample Bill Calculation

Example Billing Calculation for Usage BELOW the Normal Average Usage Band:

Resident's Actual Monthly Usage = 750 kWh

Monthly LTG Average = 1000 kWh

Difference between resident's usage and the normal average usage band:

$$750 \text{ kWh} - 1000 \text{ kWh} = (250 \text{ kWh})$$

Billing amount is calculated by applying the current effective electric rate to determine the charges for usage below the buffer:

$$(250 \text{ kWh}) \times \$0.14326/\text{kWh} = \boxed{\text{\$35.82 REBATE}}$$

Payment owed when total payment amount exceeds >\$50

-OR-

Rebate issued when total rebate amount exceeds > \$50

Program Locations Overview

LIVE

- Dover AFB – January 2025
- Buckley AFB – January 2025
- Air Force Academy – May 2025
- Moody AFB – September 2025

IMPLEMENTATION

- Little Rock AFB – February 2026
- Maxwell AFB – February 2026

Air Force Academy's Transition*

Residents have earned more than \$25,000 in UA Rebates!

	Sep-25	Oct-25	Nov-25	Dec-25
# of Billable Residents	474	473	486	490
Residents with Higher Than Average Usage (Statement Charges)				
# Residents with Statement Charges	214	220	226	232
%Residents with Statement Charges	45%	47%	47%	47%
Average Charge Amount	\$ 44.97	\$ 29.20	\$ 32.28	\$ 28.45
# Residents with Statement Charges \geq \$50.00	76	45	41	40
% Residents with Statement Charges \geq \$50.00	16%	10%	8%	8%
Average Statement Charge	\$ 87.34	\$ 73.58	\$ 84.87	\$ 77.05
Highest Statement Charge	\$ 198.50	\$ 160.71	\$ 216.62	\$ 179.20
Residents with Less Than Average Usage (Statement Rebates)				
# Residents with Statement Rebates	260	253	260	258
% of Residents with Statement Rebates	55%	53%	53%	53%
Average Rebate Amount	\$ (32.20)	\$ (21.81)	\$ (21.64)	\$ (23.26)
# Residents with Statement Rebates \geq \$(50.00)	52	13	14	27
% Residents with Statement Rebates \geq \$(50.00)	11%	3%	6%	6%
Average Rebate Amount	\$ (66.74)	\$ (63.76)	\$ (65.06)	\$ (63.42)
Highest Statement Rebate	\$ (143.42)	\$ (111.56)	\$ (116.70)	\$ (106.31)

On average, the majority of residents in the community (**89% of residents**) would have **NO ACTION** required in each billing period (i.e. below the \$50 payment threshold).

**Average outcomes for September – December 2025 billing periods.*

Videos

Below are brief videos showing an overview of how monthly utility services will be billed for active duty residents under the UA Program & best practices for conserving energy and reducing your household's utility bills.

Resources for Residents

- Resources for High Users:
 - Conservation Tip Sheets
 - Online Energy Assessment Checklist
 - Energy Assessment Walkthrough Video (5 min video on property website)
 - In-Home Energy Assessment
 - Maintenance Service for Equipment Concerns
 - Preventative Maintenance for A/C and water heaters upon resident request

Electric Conservation Tips

Ten percent of the average US household's electric use is caused by unused electronics that are plugged into the wall. Here are some tips for conserving electricity in your home and managing unused electronics, commonly referred to as "Vampire Loads".

LIGHTING

- If left on constantly, an LED light could last for up to 50,000 hours, or 6 years, which is 50 times longer than a regular 60-watt incandescent bulb.
- Bathroom vanity lights are one of the most used fixtures in the average home. Use energy-efficient lighting, which can provide bright, warm light while using less energy and generating less heat than standard bulbs.
- Choose light colors for furniture. Light colors reflect light. Dark colors absorb light and require higher bulb wattages.
- Clean lighting fixtures regularly. Dust on lamps, reflectors, and light bulbs impair lighting efficiency.

Resident App Manual

Home Energy Assessment Checklist Resident Version

Item Description	Heating/Cooling System			Comments
	Yes	No	NA	
Are A/C thermostats set at 75-78 degrees or heat thermostats set at 68-72 degrees?				Each degree of heating or cooling can cost an additional four to five percent in energy costs.
Are fans (ceiling/portable) used to circulate air flow?				If resident chooses to purchase and install ceiling fans, alterations request must be approved by the housing office.
Are your ceiling fan(s) adjusted for the season?				Counter clockwise in cooling season to cool home, clockwise in heating season to force warm air from ceiling.
Is there a draft in the room?				Contact the Maintenance Dept. and submit a work order request indicating the location of the draft.
Do you adjust your thermostat in evenings/mornings?				Recommend adjusting 5-10 degrees.
Are the dampers adjusted correctly per season?				If unknown, contact the Maintenance Dept.
Do you adjust your thermostat when taking long trips?				Heating not lower than 50 degrees due to pipes possibly freezing, cooling no higher than 85 degrees.
Is the exterior of HVAC clean, no debris blocking air flow?				Do not attempt to clean, contact the Maintenance Dept.
Are the HVAC lines insulated?				If not, contact the Maintenance Dept.
Are front/back/garage doors &/or windows left open while A/C or heater are working?				Recommend home is closed up when either appliance is active.
Are vents in low traffic areas partially/fullly closed to help push air to high traffic areas?				Example - If your family rarely uses the dining room area, it may be a good idea to close or partially close the vent which will in turn push the air flow into other parts of the home.
Are the air outlets/intake free of obstructions?				Example - Please make sure no furniture is obstructing the vent.
Are windows open during spring/fall rather than using heating/cooling system?				In historic homes, at least one window per room should be operational. Contact the Maintenance Dept. & submit a work order request.
During heating season, are blinds/curtains open in day and closed at night?				Allowing sunlight in during the day helps with heating and closing them at night blocks cold air.
During cooling season, are curtains closed in day and open at night?				Preventing sunlight in during the day helps with cooling and opening them at night allows cooler air.
Do you have heat producing electronics/appliances located near thermostat(s)?				Don't place lamps or TV sets near your thermostat. The thermostat senses heat from these appliances, which can cause the air conditioner to run longer than necessary.
Are air filters replaced monthly?				Filters are available at the Maintenance Dept. on Warehouse Rd.

Suggestions:

- To select ideal temperature, increase/decrease thermostat by 2 degrees every day until perfect temperature.
- When entertaining larger groups, adjust thermostat 3-5 degrees lower. The more people there are, the more warm the room(s) will be.
- When adjusting the thermostat, remember that the house will not warm up or cool down any faster if you crank up the thermostat past the desired temperature.

Address Community

Welcome to the **Hunt Energy Assessment Checklist**! This convenient tool is designed to help you evaluate your home energy usage and identify opportunities for improving your energy conservation efforts. By completing the checklist, you'll gain valuable insights into your energy consumption, uncover potential savings, and learn how to enhance your home's efficiency.

Estimated Time to Complete? 10-15 minutes. Please ensure you have access to any relevant information about your appliances and usage patterns.

1 General Household Questions **2** HVAC **3** Water **4** Lighting **5** Lifestyle **6** Maintenance

Is your heating system running constantly during heating season?

For heating, what temperature is your thermostat usually set to?

HMC EV Charging Policy

In-home EV charging is not permitted

- As outlined in your Community Guidelines.
- Aligns with the Department of the Air Force EV policy (17MAR23).

Prioritizing safety

- Older housing/infrastructure may have limited capacity.
- House fires caused by unauthorized charges and overloaded circuits.
- Unsecured homes and trips hazards created by extension cords and cables.

Evaluating a possible future solution

- Collaborating with partners to assess feasibility while safeguarding infrastructure integrity.
- Evaluating community charging options that deliver greater cost-saving benefits than public charging stations.

Simplify Your Rebates

Skip the Hassle—Receive Your Utility Rebates via Direct Deposit

Easy ACH Setup for Payments & Refunds

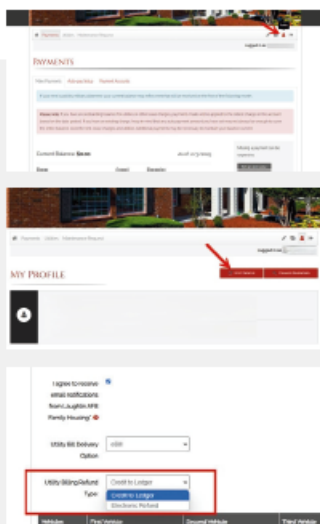

Below are the steps and screenshots from Hunt's RentCafe portal to help residents set up ACH for payments and refunds, including those related to the Air Force Utility Allowance (UA) Program.

Utility Billing Refund Type* Setup for Residents

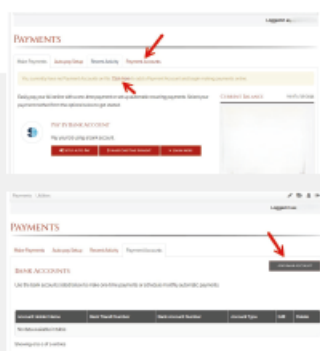

1. Log into the resident portal, go to **PROFILE**, and select to **EDIT PROFILE**.
2. Select the drop-down menu for **UTILITY BILLING REFUND TYPE**. This is where the resident will opt in for "Credit to Refund" or "Electronic Refund."
3. Click to select **CREDIT TO LEDGER** to opt in for your utility rebate to accumulate on your ledger.
4. Click to select **ELECTRONIC REFUND** to opt in for your rebate to be paid out once the balance of your utility refund exceeds the \$50 threshold amount.

NOTE: You will be required to enter your ACH banking information in order to complete the setup.

Overview of ACH Setup for Residents

1. On the Payments screen, select either the **PAYMENT ACCOUNTS** tab or **CLICK HERE**.
2. Select "Add Bank Account." This is where the resident will add routing and account information.

HuntMilitaryCommunities.com

- **How to Register for Auto Payments:**
 - Go to **PAYMENTS**, select **AUTO PAY SETUP**.
 - Select your Payment Account, Start Date, and Payment Percent (in most cases you'll select 100%).

- **How to Opt In for Electronic Refunds:**
 - Go to the resident portal, select **EDIT PROFILE**.
 - Click the **UTILITY BILLING REFUND TYPE** drop-down menu.
 - Click to select **ELECTRONIC REFUND**.

- **IMPORTANT NOTE:** You will be required to enter your ACH banking information in order to complete the auto pay and electronic refund setup.

AUTO PAY SETUP

HOW TO SET UP AUTO PAY FOR VARIABLE CHARGES ON THE WEB

Set Up, Change, or Cancel Auto Pay

Log into the Hunt Resident Portal, and once you have reached the home screen, select:

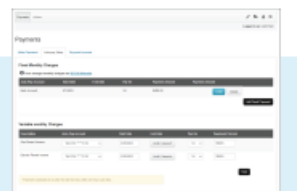

Payments > Auto-pay Setup

Once you have arrived to the Auto-pay Setup page, follow these easy steps:

01

Select Payment Account

Under the Variable Monthly Charges section, select the account you want to use for the payment. Select your Start Date, End Date (optional), Pay On (1st-5th), and Payment Percent. *In most cases, you'll select 100%.

Complete this step for the options you want to setup auto pay for. Example: Electric & Gas.

02

Review Summary and read through Terms & Conditions

A confirmation window will appear where you can review the summary. Once you have carefully read through the summary and Terms and Conditions, select the 'I have read and accepted the Terms and Conditions' button and submit.

Please carefully read through the summary and the Terms and Conditions before submitting.

03

Confirmation

A confirmation email will be sent to your email address.

Helpful Information:

1. Residents must have a Payment Account set up before setting up Auto Pay.
2. Auto Pay can be set up at any time. Payment date options are the 1st - 5th of each month.
3. Auto Pay for utilities will make payments to utility charges without manual intervention as long as:
 - a. Utility charges are present on the ledger.
 - b. The auto-pay setup was not given an end date.
 - c. The payment type used is an active account (Example: Open bank account, debit card not expired, etc.).
4. If applicable, Active Duty residents will be able to set up Auto Pay only for their utility charges as their rent is covered by their BAH.

QUESTIONS?

Resources

Conservation Tips

Lighting

- Replace incandescent bulbs with LEDs where possible. If left on constantly, an LED light could last for up to 50,000 hours, or 6 years, which is 50 times longer than a regular 60-watt incandescent bulb.
- Clean lighting fixtures regularly. Dust on lamps, reflectors, and light bulbs impair lighting efficiency.

Heating/Cooling

- Leave window shades, drapes and/or blinds closed during the day
- Replace filters more frequently if there are pets in the home.
- Use ceiling fans. Also run kitchen and bath exhaust fans long enough.
- Open windows during the moderate weather of spring and fall

Electronics

- Unplug infrequently or seasonally used power supplies
- Buy ENERGY STAR®-labeled electronics.
- Consolidate multiple power supplies on a single power strip

Appliances

- Gas flames from your stove should burn with a clear blue color. A yellow flame may indicate your burner isn't operating efficiently.
- Carefully time your preheat period when baking.
- Defrost the freezer regularly.
- Wash clothes in cold water whenever possible.

High Usage Concern – Energy Assessment Process
